## Introduction

### **Werner Prize** (New Swiss Chemical Society)

1997: *Yannick Landais*

The *Werner Prize* is awarded to a young Swiss scientist or another young researcher carrying out his functions in Switzerland, for high-quality work in the field of chemistry. Candidates (male or female) can either be from an academic chemistry or industrial background.

### **Ruzicka Prize** (Swiss Federal Institute of Technology Zürich)

1996: *Aleksander Rebane*

1997: *Yves Rubin*

The *Ruzicka Prize* is awarded each year to a young scientist for his/her outstanding, published contribution in the field of general chemistry, achieved either in Switzerland or by a Swiss citizen abroad. In 1957, a generous donation by the Swiss Chemical Industry enabled the national government to install a special fund. Following the exhaustion of capital after 30 years time, the prizes were provided by the *Huber-Kudlich* foundation. In 1993, the responsibility for the *Ruzicka Prize* was transferred to the ETH-Zürich. The foundation was once again financed by contributions from the chemical industry.
