## Lectures

### Basler Chemische Gesellschaft

4./5. April, 2006 **Polymers in Life Sciences 2006**  
9.00–17.30  
Centre Loewenberg Muntelier/Murten  
For the third time, the University of Basel and the Polymer Group of Switzerland organize 'Polymers in Life Sciences (PILS)' an international and interdisciplinary two-day symposium, which will take place in early April near Murten/CH. We have been able to round up an international, diverse, and very interesting group of speakers from various PILS subfields. We would also like to draw your attention to a new feature of PILS 2006: there is the possibility for contributed talks of 15 + 5 minutes, which should be of interest for you or your coworkers. As usual there is also the possibility of a poster presentation. Weitere Info: <http://www.chemie.unibas.ch/~taubert/PILS2006.pdf>; [PILS2006@unibas.ch](mailto:PILS2006@unibas.ch)

### Departement für Chemie und Biochemie der Universität Bern, Anorganische, Analytische und Physikalische Chemie

11.15, Hörsaal 481, Freiestrasse 3, Bern

6. April, 2006 *Prof. Dr. Zlatko Bacic*  
Dept. of Chemistry, New York University, USA  
'Molecule-doped clusters of helium and molecular hydrogen: Structural and dynamical aspects of quantum solvation'

13. April, 2006 *Prof. Dr. L.K. Thompson*  
Department of Chemistry, Memorial University, St. John's, Canada  
'Self-assembled, flat poly-manganese [n<sub>xn</sub>] grids (n = 2,3,4,5) – magnetic and redox platforms for molecular device behaviour'

20. April, 2006 *Dr. Antoine Daridon*  
SpinX Technologies SA, Meyrin, Schweiz

Thema wird später bekannt gegeben.  
Fachgebiet: Microfluidics

27. April, 2006 3ème Cycle en Chimie, Colloque  
*Dr. Klaas A. Zachariasse*  
Abt. Spektroskopie und Photochemische Kinetik, Max-Planck-Institut für biophysikalische Chemie, Göttingen  
'Photoinduced Intramolecular Charge Transfer. Gas Phase, Crystals and Solution'

### Département de Chimie minérale, analytique et appliqué, Université de Genève

16.30, Salle A150, 30, quai Ernest-Ansermet

5. avril, 2006 *Dr. Scott Altmann*  
Agence Nationale pour la Gestion des Déchets Radioactifs, Service Transfert, Châtenay-Malabry, France  
'La recherche physico-chimique à l'appui de l'évaluation de sûreté d'un concept de stockage de déchets radioactifs en géologie profond: exemples et perspectives'

12. avril, 2006 *Prof. Ludwig Gauckler*  
Department Materials, ETH Zürich  
'Miniaturization of Solid State Ionic Devices'

26. avril, 2006 *Prof. Koen Binnemas*  
Department of Chemistry, Katholieke Universiteit Leuven, Belgium  
'Liquid-Crystalline Lanthanide Complexes'

### Institut de Chimie, Université de Neuchâtel

10.30, Petit Auditoire

12. avril, 2006 Colloque du 3e cycle  
*Prof. Paul R. Raithby*  
University of Bath, GB  
'Structure-Property Correlations in Heavy Transition Metal Dienes and Polyynes'

## Congresses – Conferences – Workshops

### Nanoanalysis

Datum: Montag und Dienstag, 10. und 11. Juli 2006  
Ort: Zürich, Switzerland, ETH Zentrum  
Fragen an: [ford@org.chem.ethz.ch](mailto:ford@org.chem.ethz.ch)  
Anmeldung / weitere Informationen unter:  
<http://www.ceac.ethz.ch>
