

Congratulations to the Winners of the METTLER TOLEDO Award

Dear Scientist

METTLER TOLEDO would like to congratulate the winners of the METTLER TOLEDO award for best oral presentations.

As a partner and sponsor of the Swiss Chemical Society we would like to thank the SCS for giving METTLER TOLEDO the possibility to participate in the development of young scientists.

Our laboratory instruments are the foundation of research labs all over the world. We are the market leader in balances, the most commonly used instrument in the lab. In addition, scientists like you turn to our analytical instruments, such as titrators and thermal analysis, when they need details on compensation or properties of liquids or substances. Our pipettes RAININ, widely used at universities and in industry to measure and dispense small volumes of liquid, lead the market because of their innovative ergonomic design. Additionally, we shorten the time to market for life science start-ups by accelerating the synthesis, purification and process research and development of drug candidates through integration, automation and sophisticated software solutions.

METTLER TOLEDO not only supports scientists with the METTLER TOLEDO prize at the SCS Fall Meeting. We also assist young researchers in projects of the Swiss National Science Foundation and other scientific programs. As industrial partner we work with several groups on advancing our devices. Thus, we try to establish cooperation between university and industry already during the doctoral theses.

We wish all young scientists all the best in the future, be it in the academic or industrial environment.

METTLER TOLEDO

Giulio Pè
