Subject Index

CHIMIA 65 (2011)

Acesulfame

Highlights of Analytical Chemistry in Switzerland: Acesulfame: From Sugar Substitute to Wastewater Marker, 176

Acetanilides

On-line Reaction Monitoring of Lithiation of Halogen Substituted Acetanilides *via in situ* Calorimetry, ATR Spectroscopy, and Endoscopy, 253

Acetone

Highlights of Analytical Chemistry in Switzerland: Non-invasive Medical Diagnostic by Breath Analysis: Acetone Detection, 105

Acetylenes

Cyclopropanes and Hypervalent Iodine Reagents: High Energy Compounds for Applications in Synthesis and Catalysis, 649

Activated cyclopropanes

Cyclopropanes and Hypervalent Iodine Reagents: High Energy Compounds for Applications in Synthesis and Catalysis, 649

Active methylene compounds

Active Methylene-Based Multicomponent Reactions under Microwave Heating, 925

Activity

Advanced Research on *cis*-Neonicotinoids, 957

Aerogels

Marine Polysaccharides and their Conversion into Functional Materials, 81

Aldolase

Total Asymmetric Synthesis of Monosaccharides and Analogues, 85

Alkenes

Water-stable *fac*-[TcO_3]⁺ Complexes – A New Field of Technetium Chemistry, 776

Allene

Highly Selective Rhodium Catalyzed Domino C–H Activation/Cyclizations, 271

Allylation

Total Asymmetric Synthesis of Monosaccharides and Analogues, 85

Highly Selective Rhodium Catalyzed Domino C–H Activation/Cyclizations, 271

Amines

Functional Group Distributions on Mesoporous Silica, 250

Amino acids

Application of Nickel(II) Complexes to the Efficient Synthesis of α - or β -Amino Acids, 919

Analytical chemistry

Advancing Membrane Electrodes and Optical Ion Sensors, 141

Androstadiene

International Year of Chemistry 2011: A Streamlined Synthesis of Androstadiene C-17 Ester Derivatives, 877

Anion recognition

Anion Recognition by Charge Neutral Electron-deficient Arene Receptors, 939

Anion- π interactions

Anion Recognition by Charge Neutral Electron-deficient Arene Receptors, 939

Anisotropic nanoparticles

FH-HES: Influence of the Hydrogen Reduction Time and Temperature on the Morphology Evolution and Hematite/Magnetite Con-

version of Spindle-type Hematite Nanoparticles, 979

Antagonist

E- and P-Selectin: Differences, Similarities and Implications for the Design of P-Selectin Antagonists, 210

Anti-cancer

Pushing the Frontiers of First-Principles Based Computer Simulations of Chemical and Biological Systems, 667

Anti-oxidative effect

Carotenoids, 109

Antibiotic

FH-HES: Applied R&D at the Universities of Applied Sciences, 621

Antibodies

Synthetic Vaccines from Tumor-Associated Glycopeptide Antigens, 30

International Year of Chemistry 2011: Antikörper-Wirkstoff-Konjugate – ein neues Zeitalter für die personalisierte Krebsbehandlung beginnt, 746

Screening of Large Molecule Diversities by Phage Display, 843

Anticoagulant

Rational Design of Anticoagulant Drugs Using Oligosaccharide Chemistry, 14

Antifungal

Chitin Synthase, a Fungal Glycosyltransferase that Is a Valuable Antifungal Target, 49

Antigens

Synthetic Vaccines from Tumor-Associated Glycopeptide Antigens, 30

Applied research

FH-HES: Applied R&D at the Universities of Applied Sciences, 621

Arabinose

Sugar-Derived Ionic Liquids, 76

Artificial photosynthesis

Artificial Photosynthesis at Soft Interfaces, 356

Artificial sweetener

Highlights of Analytical Chemistry in Switzerland: Acesulfame: From Sugar Substitute to Wastewater Marker, 176

Asymmetric aldol

Total Asymmetric Synthesis of Monosaccharides and Analogues, 85

Asymmetric catalysis

Enantioselective Diels-Alder Reactions of Unsaturated β -Ketoesters Catalyzed by Chiral Ruthenium PNNP Complexes, 231

Catalytic Asymmetric Functionalization of Inert Bonds and Synthesis of Bioactive Natural Products, 656

New Catalytic Asymmetric Strategies to Access Chiral Aldehydes, 802

The Recent Development of Organofluorine Chemistry in China: Asymmetric Construction of Stereogenic Trifluoromethyl-Substituted Carbon Centers, 894

Asymmetric IMDA reaction

Asymmetric Intramolecular Diels-Alder Reactions of Trienals Catalyzed by Chiral Ruthenium Lewis Acids, 268

Asymmetric photoreactions

Gramaticakis-Neumann Prize 2010: Fun with Photons: Selective Light Induced Reactions in Solution and in Water Soluble Nanocontainers, 202

Asymmetric synthesis

Werner Prize 2011: New Carbon- and Sulfur-based Ligands in Catalysis, 806

Atomic hydrogen

Synthetic Vaccines from Tumor-Associated Glycopeptide Antigens, 30

Southwest China

Highlights of Analytical Chemistry in Switzerland: Continuum Between Ritual and Medicinal Use of Plants: Smoke Analysis of Ritual Plants from Southwest China, 438

Spectroscopic imaging

Chemical Imaging on the Nanoscale – Top-Illumination Tip-Enhanced Raman Spectroscopy, 235

Spectroscopy

Shining Light at Working Interfaces and Chiral Nanoparticles, 157

Sphingolipids

Chemical Biology Approaches to Membrane Homeostasis and Function, 849

Split-operator method

Accelerating Calculations of Ultrafast Time-Resolved Electronic Spectra with Efficient Quantum Dynamics Methods, 334

Stable isotopes

Geochemical Compositions of Marine Fossils as Proxies for Reconstructing Ancient Environmental Conditions, 787

Stark deceleration

Preparation of Translationally Cold Neutral Molecules, 725

Stereochemistry

Organic Synthesis without Stoichiometric Reagents: A Guiding Principle for Reaction Development, 150

Conference Report: The 46th EUCHEM Conference on Stereochemistry (Bürgenstock

Conference 2011), Brunnen, May 1–6, 2011, 612

Stereogenic trifluoromethyl-substituted carbon center

The Recent Development of Organofluorine Chemistry in China: Asymmetric Construction of Stereogenic Trifluoromethyl-Substituted Carbon Centers, 894

Stereoselectivity

Synthesis of the β -Rhamnopyranosides and the 6-Deoxy- β -mannoheptopyranosides, 59

Polymer and Colloid Highlights: Chemo- and Stereoselective ROMP, 106

Sterols

Chemical Biology Approaches to Membrane Homeostasis and Function, 849

Stimulated emission

Accelerating Calculations of Ultrafast Time-Resolved Electronic Spectra with Efficient Quantum Dynamics Methods, 334

STM

Investigation of *h*-BN/Rh(111) Nanomesh Interacting with Water and Atomic Hydrogen, 256

Strongly correlated electron systems

Ultrafast Structural Dynamics in Condensed Matter, 308

Structure sensitivity

Integrated Approach for the Intensification of Heterogeneous Catalytic Processes, 699

Structure-property relationships

Computational Design of Molecular Properties: Spotlight on Accuracy and Tuning, 638

Structured catalyst

Integrated Approach for the Intensification of Heterogeneous Catalytic Processes, 699

Sugar amino acid

Oxetanes from the Ring Contraction of γ -Triflates of γ -Lactones: Oxetane Nucleosides and Oxetane Amino Acids, 71

Sulfasalazine

Searching for the Protein Targets of Bioactive Molecules, 720

Sulfoxides

Werner Prize 2011: New Carbon- and Sulfur-based Ligands in Catalysis, 806

Supported synthesis

Sugar-Derived Ionic Liquids, 76

Supramolecular catalysis

Gramaticakis-Neumann Prize 2010: Fun with Photons: Selective Light Induced Reactions in Solution and in Water Soluble Nanocontainers, 202

Surface catalysis

Can Energetic Terahertz Pulses Initiate Surface Catalytic Reactions on the Picosecond Time Scale? 323

Surface dynamics

Time-Resolved Photoelectron Spectroscopy to Probe Ultrafast Charge Transfer and Electron Dynamics in Solid Surface Systems and at Metal-Molecule Interfaces, 342

Surface modification

Polymers Interfacing with Biology, 659

Surface-initiated polymerization

Polymer and Colloid Highlights: Diagnostic and Sensory Polymer Brushes, 276

Sustainable agriculture

Lipo-Chitooligosaccharidic Nodulation Factors: Synthesis and Agricultural Perspectives, 45

Suzuki reaction

Application of Nickel(II) Complexes to the Efficient Synthesis of α - or β -Amino Acids, 919

Suzuki-Miyaura reaction

Access to Macrocycles with an *endo* Aryl Ether and an *endo* Aryl-Aryl Bond, Development and Application, 168

Swiss Association of Spectrometry

Conference Report: Bericht von der 25. Spektrometertagung (2011) in Schaffhausen, 976

Swiss Biotech Association

Conference Report: Biotech in Medicine – The Topic of the Olten Meeting 2010, 100

Swiss Chemical Society

Editorial: Laureates: Awards and Honors, SCS Fall Meeting 2010, 200

Editorial: Invitation to attend the Fall Meeting of the Swiss Chemical Society in Lausanne, on Friday, September 9, 2011, 460

Swiss National Science Foundation

Editorial: Institutional Young Fellows, 764

SwissFEL

Towards High-power Single-cycle THz Laser for Initiating High-field-sensitive Phenomena, 320

Can Energetic Terahertz Pulses Initiate Surface Catalytic Reactions on the Picosecond Time Scale? 323

Synthesis

Organic Synthesis without Stoichiometric Reagents: A Guiding Principle for Reaction Development, 150

Cyclopropanes and Hypervalent Iodine Reagents: High Energy Compounds for Applications in Synthesis and Catalysis, 649

Synthetic probes

Visualizing Biochemical Activities in Living Cells through Chemistry, 868

Synthetic receptors

Anion Recognition by Charge Neutral Electron-deficient Arene Receptors, 939

Tandem mass spectrometry MS/MS

High-Resolution and Tandem Mass Spectrometry – the Indispensable Tools of the XXI Century, 641

Target deconvolution

Searching for the Protein Targets of Bioactive Molecules, 720

Technetium

Water-stable *fac*-{TcO₃}⁺ Complexes – A New Field of Technetium Chemistry, 776

Telescope

International Year of Chemistry 2011: A Streamlined Synthesis of Androstadiene C-17 Ester Derivatives, 877

Terahertz spectroscopy

Photoinduced Interfacial Electron Transfer and Lateral Charge Transport in Molecular Donor-Acceptor Photovoltaic Systems, 353

Tetrahydrobiopterin

Searching for the Protein Targets of Bioactive Molecules, 720

Textural properties

Marine Polysaccharides and their Conversion into Functional Materials, 81

Theoretical chemistry

Conference Report: 47th Symposium on Theoretical Chemistry 2011 (STC 2011), 970

Thermoset resin

International Year of Chemistry 2011: Microen-
