Subject Index

CHIMIA 66 (2012)

ABC transporter

Highlights of Analytical Chemistry in Switzerland: X-Ray Structure of a Heterodimeric ABC Transporter Crystallized in its Inward-Facing Conformation, 802

Academic careers

SCNAT: The YFM 2012 – Emerging Research and Established Needs: Fund Raising, Publishing and Career Advancement, 716

Acetaminophen

Liquid Chromatography High-resolution Mass Spectrometric QUAL/QUAN Approaches for Drug Metabolism and Metabolomics, 218

Activated cyclopropanes

Indole Alkaloids Synthesis *via* a Selective Cyclization of Aminocyclopropanes, 233

Active sites

Active Sites, Deactivation and Stabilization of Fe-ZSM-5 for the Selective Catalytic Reduction (SCR) of NO with NH₃, 687

Aggregation control

Polymer and Colloid Highlights: Non-aggregating Poly(p-benzamide)s, 258

Alkaloids

Indole Alkaloids Synthesis *via* a Selective Cyclization of Aminocyclopropanes, 233

Radical-mediated Dimerization and Oxidation Reactions for the Synthesis of Complex Alkaloids, 389

Alkyne

Selective Alkyne Hydrogenation over Nanometal Systems: Closing the Gap between Model and Real Catalysts for Industrial Applications, 681

Allenes

Heteroatom Nucleophile Induced C–C Fragmentations to Access Functionalized Allenes, 205

Allergy

Highlights of Analytical Chemistry in Switzerland: Allergy Diagnostics Using Magnetic Beads in a GRAVI™-Cell Microfluidic Device, 950

Alpha spectrometry

Highlights of Analytical Chemistry in Switzerland: Polonium – on the Trace of a Powerful Alpha Nuclide in the Environment, 131

Alternating access model

Highlights of Analytical Chemistry in Switzerland: X-Ray Structure of a Heterodimeric ABC Transporter Crystallized in its Inward-Facing Conformation, 802

4-Aminoproline peptides

4(*R/S*)-Amino/Guanidino-substituted Proline Peptides: Design, Synthesis and DNA Transfection Properties, 936

Aminosugars

Functionalization of Glycals Leading to 2-Deoxy-*O*-glycosides, Aminosugars, Nitrosugars and Glycosidase Inhibitors: Our Experience, 905

Amiodarone

The Hospital Pharmacist: An Important Con-

tributor to Improved Patient Safety in the Hospital, 300

Amyloid fibrils

Biological Solid-state NMR at ETH Zurich, 798

Analgesics combination

Validation of the Simplified UVB Model to Assess the Pharmacodynamics of Analgesics in Healthy Human Volunteers, 296

Androst-4-ene-3,17-dione

Combination of Homonuclear Decoupling and Spectral Aliasing to Increase the Resolution in the ¹H Dimension of 2D NMR Experiments, 764

Anion adsorption

Electrochemical Scanning Tunneling Microscopy, 44

Antioxidant activity

How to Increase the Safety and Efficacy of Compounds against Neurodegeneration? A Multifunctional Approach, 286

Apple

Exploring High-resolution Magic Angle Spinning (HR-MAS) NMR Spectroscopy for Metabonomic Analysis of Apples, 747

APSY

Automated Projection Spectroscopy (APSY) for the Assignment of NMR Resonances of Biological Macromolecules, 770

Aqueous lubrication

Influence of Solutes on Hydration and Lubricity of Dextran Brushes, 192

Arabidopsis

Highlights of Analytical Chemistry in Switzerland: Cell Growth Processes in *Arabidopsis thaliana* are Modified by Flavonols, 714

Aramid

Polymer and Colloid Highlights: Non-aggregating Poly(p-benzamide)s, 258

Arsenic

Highlights of Analytical Chemistry in Switzerland: Synchrotron-based Spectroscopy Reveals First Evidence for Organic Sulfur-coordinated Arsenic in Peat, 877

Asymmetric catalysis

Recent Advances in Iridium-Catalyzed Asymmetric Hydrogenation: New Catalysts, Substrates and Applications in Total Synthesis, 187

Palladium-NHC Catalyzed Enantioselective Synthesis of Fused Indolines *via* Inert C(sp³)-H Activation, 241

Werner Prize 2012: Teaching Enantioselectivity to C–H Bond Functionalizations: Initial Steps of a Rather Long Shot, 869

Asymmetric conjugate addition

Copper-catalyzed Asymmetric Conjugate Addition to Challenging Michael Acceptors and Synthesis of Relevant Target Molecules, 196

Atom transfer radical polymerization (ATRP)

Polymer and Colloid Highlights: ATRPases: Enzymes as Catalysts for Atom Transfer Radical Polymerization, 66

Atomic force microscope

Scanning Probe Microscopy of Atoms and Molecules on Insulating Films: From Imaging to Molecular Manipulation, 10

Exploring Forces between Individual Colloidal

Particles with the Atomic Force Microscope, 214

ATRA

Ruthenium-catalyzed Atom Transfer Radical Addition Reactions, 386

ATRC

Ruthenium-catalyzed Atom Transfer Radical Addition Reactions, 386

Autoinduction media

New Expression Method and Characterization of Recombinant Human Granulocyte Colony Stimulating Factor in a Stable Protein Formulation, 281

Automated assignment

Automated Projection Spectroscopy (APSY) for the Assignment of NMR Resonances of Biological Macromolecules, 770

Automated projection spectroscopy

Automated Projection Spectroscopy (APSY) for the Assignment of NMR Resonances of Biological Macromolecules, 770

Automotive catalysis

Perovskite-supported Palladium for Methane Oxidation – Structure–Activity Relationships, 675

Auxin

Highlights of Analytical Chemistry in Switzerland: Cell Growth Processes in *Arabidopsis thaliana* are Modified by Flavonols, 714

Azaheterocycles

Mn(III)-Catalyzed Radical Reactions of 1,3-Dicarbonyl Compounds and Cyclopropanols with Vinyl Azides for Divergent Synthesis of Azaheterocycles, 377

Azidosugars

Functionalization of Glycals Leading to 2-Deoxy-*O*-glycosides, Aminosugars, Nitrosugars and Glycosidase Inhibitors: Our Experience, 905

Aziridines

Tetraethylammonium Tetraselenotungstate: A Versatile Selenium Transfer Reagent in Organic Synthesis, 921

Ballistic electron emission microscopy

Electron Transport at Surfaces and Interfaces, 23

Banknotes

Highlights of Analytical Chemistry in Switzerland: Detection and Significance of Cocaine Traces on Swiss and Euro Banknotes, 346

BARD1

FH-HES: Construction of a Peptide Microarray for Auto-antibody Detection, 803

β-Barrel membrane proteins

Solution NMR Studies of Membrane-Protein-Chaperone Complexes, 759

Bi(111)

Electron Transport at Surfaces and Interfaces, 23

Bioactive natural products

New Approaches for Studying the Chemical Diversity of Natural Resources and the Bioactivity of their Constituents, 324

Biocatalysis

Polymer and Colloid Highlights: ATRPases: Enzymes as Catalysts for Atom Transfer Radical Polymerization, 66

Biochemical engineering

FH-HES: Sustainable Chemistry at the Universities of Applied Sciences, 645

Bioconcentration

How to Increase the Safety and Efficacy of Compounds against Neurodegeneration? A Multifunctional Approach, 286

Bioinorganic chemistry

NMR Spectroscopy in Bioinorganic Chemistry, 791

Biology

L'Éprouvette: A Special Place to Get a Flavor of Research and to Debate about Research Issues, 851

Life Science Zurich Learning Center – A New Symbiosis of Research Institutions and Schools, 853

Biomarkers

Biomimetic Models of Radical Stress and Related Biomarkers, 368

Biotechnology

Conference Report: Olten Meeting 2011 – Where Benign Cells Meet, 61

BioValley

BioValley College Network (BCN): Trinational Network to Intensify the Teaching of Natural Science at Gymnasia Level, 857

Blackbody radiation

Dynamical Processes in Rydberg-Stark Deceleration and Trapping of Atoms and Molecules, 208

Block copolymer self-assembly

Polymer and Colloid Highlights: Introducing a Reversible Linkage to Block Copolymer Self-Assembly: Towards Controlling Nanopore Chemistry, 444

Block copolymers

Some Aspects of the Radical Chemistry of Xanthates, 404

Born-Oppenheimer approximation

Excited State Dynamics with Quantum Trajectories, 174

Borohydrides

Free Radical-mediated Hydroxymethylation Using CO and HCHO, 372

Boron

Recent Advances in Iridium-Catalyzed Asymmetric Hydrogenation: New Catalysts, Substrates and Applications in Total Synthesis, 187

NHC-Boranes: Air- and Water-tolerant Co-initiators for Type II Photopolymerizations, 382

Boronic acids

Supramolecular Assemblies Based on Dative Boron–Nitrogen Bonds, 212

Broadband homonuclear decoupling (BBHD)

Combination of Homonuclear Decoupling and Spectral Aliasing to Increase the Resolution in the ¹H Dimension of 2D NMR Experiments, 764

Bürgenstock conference

Conference Report: Report from the 47th EU-CHEMS Conference on Stereochemistry: The Bürgenstock Conference, 873

[¹¹C]-ABP688

Development of [¹⁸F]-PSS223 as a PET Tracer

for Imaging of Metabotropic Glutamate Receptor Subtype 5 (mGluR5), 201

C–H activation

Palladium-NHC Catalyzed Enantioselective Synthesis of Fused Indolines *via* Inert C(sp³)-H Activation, 241

Werner Prize 2012: Teaching Enantioselectivity to C–H Bond Functionalizations: Initial Steps of a Rather Long Shot, 869

C–H functionalization
