Subject Index

CHIMIA 68 (2014)

Absolute configuration

Absolute-Structure Determination: Past, Present and Future, 26

Absolute structure

Absolute-Structure Determination: Past, Present and Future, 26

Accelerating bioprocess development

Conference Report: Olten Meeting 2013 – Bioinformatics and Bioprocess Engineering, 66

Accelerator mass spectrometry (AMS)

Rapid Revelation of Radiocarbon Records with Laser Ablation Accelerator Mass Spectrometry, 215

Acetylenes

Taming Hypervalent Bonds and Strained Rings for Catalysis and Synthesis, 516

Acrylamide

A Personal Review on 40 Years at the Kantonales Labor Zurich: Success – Failure – Conclusions, 682

Activated cyclopropanes

Taming Hypervalent Bonds and Strained Rings for Catalysis and Synthesis, 516

Aerogels

Polymer and Colloid Highlights: Colloidal Routes to Macroscopic Monoliths of Porous Titania and Copper, 87

Age determination

Mass Spectrometry in Earth Sciences: The Precise and Accurate Measurement of Time, 124

Agglomeration

Chemical Aspects of Nanoparticle Ecotoxicology, 806

Aggregation

Polymer and Colloid Highlights: Formulation of Multifunctional Material Dispersions, 454

Manufactured Nanoparticle Behavior and Transformations in Aquatic Systems. Importance of Natural Organic Matter, 783

Alchemical coupling

Quantum Mechanical Treatment of Variable Molecular Composition: From 'Alchemical' Changes of State Functions to Rational Compound Design, 602

Alcohol dehydrogenative activation

Benign Synthesis of Indoles from Anilines and Epoxides: New Application for Ruthenium Pincer Catalysts, 231

Aldehydes

Efficient Synthesis of New Fluorinated Building Blocks by means of Hydroformylation, 371

Alkenes

Efficient Synthesis of New Fluorinated Building Blocks by means of Hydroformylation, 371

Divergent Reaction Mechanisms in the Aminofluorination of Alkenes, 430

Allergen

Results of an International Interlaboratory Trial to Determine Twelve Allergens Using Real-time PCR- and ELISA-based Assays, 721

Allylic alkylation

Direct Synthesis of Stereodefined and Functionalized Dienes as Valuable Building Blocks, 248

Ambient mass spectrometry

Mass Spectrometry Research at the Laboratory for Organic Chemistry, ETH Zurich, 119

Amide synthesis

The Synthesis of Sterically Hindered Amides, 252

Amino acids

Environmental Photochemistry of Amino Acids, Peptides and Proteins, 812

Aminofluorination

Divergent Reaction Mechanisms in the Aminofluorination of Alkenes, 430

2-Aminopurine

Gas-phase Lifetimes of Nucleobase Analogues by Picosecond Pump-ionization and Streak Techniques, 260

Ammine ligands

Alfred Werner's Chemistry of Dinuclear Complexes – A Test Case of Werner's Intuition, 299

Ammoniates

Analyzing Ammonia Bridges – and more about Bonding in Boron-rich Solids, 321

Analytical sciences

Conference Report: CHanalysis 2013, 331

Anilines and epoxides

Benign Synthesis of Indoles from Anilines and Epoxides: New Application for Ruthenium Pincer Catalysts, 231

Antibiotic resistance

Biotechnet Switzerland: Preventing Antibiotic Resistance by Switching off its Activity, 269

BioVersys Works to Bring Antibiotic Resistance to an End, 888

Antimony-doped tin oxide

Advanced Cathode Materials for Polymer Electrolyte Fuel Cells Based on Pt/Metal Oxides: From Model Electrodes to Catalyst Systems, 217

Antioxidant potential

Biotechnet Switzerland: Investigating the Antioxidant Capacity of Coffee! 83

Aquatic organisms

Mass Spectrometry in Environmental Toxicology, 140

Aquatic systems

Manufactured Nanoparticle Behavior and Transformations in Aquatic Systems.

Importance of Natural Organic Matter, 783

Arenes

Selective Incorporation of Difluoromethylene Moieties into Arenes Assisted by Transition Metals, 414

Asparagus

Use of Isotope Ratio Mass Spectrometry (IRMS) Determination ($^{18}\text{O}/^{16}\text{O}$) to Assess the Local Origin of Fish and Asparagus in Western Switzerland, 696

Asset class

Foundations as Promoters of Life Sciences Start-ups, 882

Asymmetric Michael addition
